

Pep Schep Ad Bible

Oct 1, 2026 · @Niels

What we make

We make people-free static ads for Pep Schep: one hero product in a scene that sets the occasion, one short Dutch headline, and a clear button. Every ad is built to stop a thumb on Instagram, Facebook or TikTok and send the viewer to pep-schep.nl.

Brand. Pep Schep is a Dutch festival and party webshop (NL and BE). It sells custom strings, bucket hats, caps, sunglasses, neon signs, hoodies and party accessories. Many products come with *eigen tekst* or *eigen foto* (your own text or photo).

Offer we can always use: gratis verzending, vandaag besteld = morgen in huis, a free goodiebag with every order.

Who the ads talk to: friend groups, vrijgezellen, festival-goers, students, gift buyers. Young, Dutch, informal. We say *jouw* and *jullie*, never *u*.

The brief an AI reads first:

You design static social ads for Pep Schep, a Dutch party and festival webshop. Each ad shows the product as the hero, without people, in a photoreal scene or a clean studio setting that makes the occasion obvious. Text is short, Dutch and informal: a bold two-to-four-word headline, an optional one-line subline, and a pill-shaped CTA. The product, its print and its colours must match the reference photo exactly.

The five reference ads

These five ads are the standard. They cover five product types and two looks: a styled photoreal scene, or a clean studio layout. None of them shows a person.

1. Neon signs: "Neon voor elke stijl."

Neon voor elke stijl.

Van game room tot beautyhoek, kinderkamer en horeca.

- **Format:** 9:16. A 2x2 grid of four rooms: game room, beauty corner, kids' room, horeca bar.
- **Why it works:** one product, four buyers. Each scene tells a different customer "this is for you". The dark, moody rooms make the neon glow the brightest thing in the frame.
- **Type:** "Neon" in hot pink, "voor elke stijl." in white, one subline listing the four uses. Glowing pink pill CTA "Bekijk het aanbod →". Small "Pep-Schep" wordmark between two thin lines.

2. String eigen tekst

- **Format:** 1:1. A hot-pink string laid flat on cream satin sheets, with pink ribbons, a gift box and a fluffy blanket at the edges.
- **Why it works:** it reads as a gift, not lingerie. The print "EIGEN TEKST" sits on the front panel, and a handwritten note with an arrow ("Jullie grap. Jouw tekst.") points straight at it.
- **Type:** "String" in black, "Eigen tekst" in pink, a plain subline. Pink pill CTA "Ontwerp de jouwe →". USP row: Gratis verzending | Gratis goodiebag. Footer: pep-schep.nl.

3. Sunglasses: "SUMMER SALE"

SUMMER SALE

JOUW STYLE. ONZE BRILLEN.

**PREMIUM
KWALITEIT**

**UV400
BESCHERMING**

**SNEL &
BETROUWBAAR**

- **Format:** 9:16 studio layout on seamless light grey. Four sunglasses float in a staggered two-column zigzag with soft shadows.
- **Why it works:** pure e-commerce clarity. One huge condensed headline, four colourways at a glance, and trust signals top and bottom.
- **Type:** "SUMMER SALE" in heavy condensed black. Letter-spaced subline "JOUW STYLE. ONZE BRILLEN." Three line icons under it (Premium kwaliteit, UV400 bescherming, Snel & betrouwbaar). Trust bar at the bottom (Veilig betalen, 14 dagen retour, rating).

4. Group strings: "Jouw vriendinnen groep"

JOUW VRIEDINNNNEN GROEP STRINGS

JOUW DESIGN. JOUW STYLE.

EIGEN TEKST
OF FOTO
OP DE VOORKANT

Icons at the bottom: Group of people, Pencil, Palette, Diamond, Delivery truck.

- **Format:** 9:16. Six strings (leopard, grey, black, bordeaux, orange, pink) on sandstone steps at a beach at sunset, in two neat rows of three.
- **Why it works:** the scene says holiday-with-the-girls, and the colour lineup says "one for each friend". A handwritten callout explains where the print goes: "Eigen tekst of foto op de voorkant".
- **Type:** brush-script headline in dark red plus "STRINGS" in heavy black. Frosted-glass panel with five USP icons. Script sign-off "Samen meer style ♥". Footer: pep-schep.nl.
- **Fix before reuse:** the headline says "VRIEDINNNEN"; it should be "VRIENDINNEN". All text needs a spelling check every time.

5. Hoodie: "SHOP NU"

SHOP NU

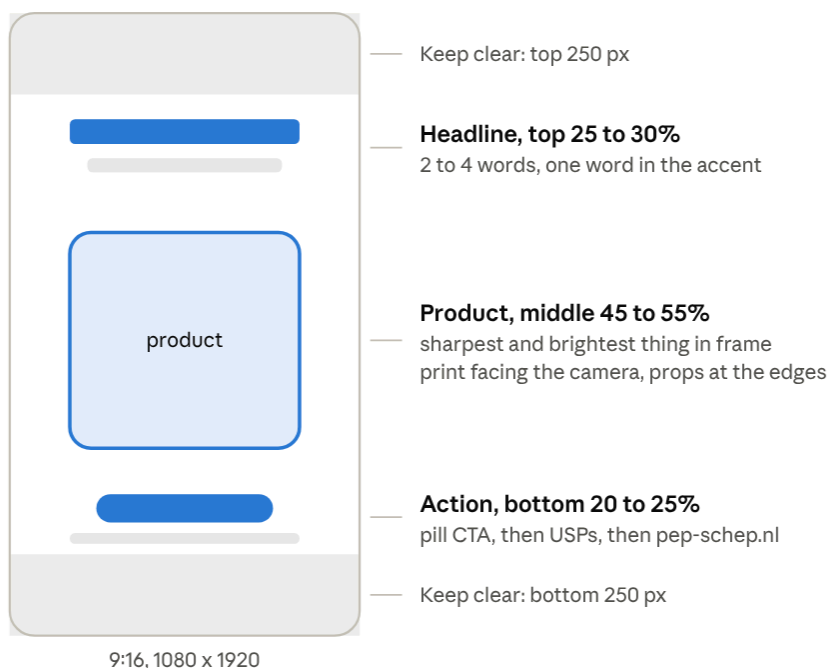

- **Format:** 9:16. A black "Après Ski Instructor" hoodie lying back-up in fresh snow, snowy pines and mountains behind, snow falling.
- **Why it works:** the photo is so on-theme that it needs no explaining. The print is the story, and the only text is a giant command.
- **Type:** "SHOP NU" in huge red letters with a thin white outline, filling the top third. Nothing else.

Ad DNA

Every ad stacks the same three zones: the headline on top, the product in the middle, and the action at the bottom. Read top to bottom, it answers "what is it", then "show me", then "what do I do".

Headline on top, product in the middle, action at the bottom

9:16 layout zones

In 1:1 and 4:5 the same three zones apply, without the keep-clear bands.

Layout rules:

- The headline sits in the top 25 to 30%. The product fills the middle 45 to 55% and is the sharpest, brightest thing in the frame.
- The bottom 20 to 25% holds the CTA, then USPs, then the footer. In 9:16, keep important text out of the top and bottom 250 px.
- Leave breathing room. Props sit at the edges and get cropped by the frame; they never compete with the product.
- The product's print faces the camera, on the side where Pep Schep really prints it (front for strings and hats, back for this hoodie).

Type:

Role	Style	Seen in
Headline	Heavy geometric or condensed sans, 2 to 4 words, often split into two colours	All five
Expressive headline	Brush or marker script, paired with one heavy sans word	Group strings
Subline	Light sans, one line; or letter-spaced capitals ("JOUW STYLE. ONZE BRILLEN.")	Neon, string, sunglasses, group strings
Handwritten note	Casual marker script with a curved arrow pointing at the print	String, group strings
CTA	White bold text in a rounded pill, ending in →	Neon, string
USP labels	Small bold capitals under thin line icons	Sunglasses, group strings, string

Colour:

- The brand accent is hot pink or magenta. Use it for one headline word and the CTA pill.
- Base colours: black and white text. A dark red works for script on warm scenes; pure red with a white outline for a loud "SHOP NU".
- The scene sets the mood palette: dark and neon at night, cream and pink for gifts, warm gold at sunset, cool white in snow, neutral grey in the studio.

Copy voice:

- Dutch, informal, short. *Jouw, jullie, je.*
- Rhythm in pairs: "Jouw design. Jouw style.", "Jullie grap. Jouw tekst."

- English is fine when it is the product's own slang: SUMMER SALE, style, Slay.
- One CTA per ad: "Bekijk het aanbod", "Ontwerp de jouwe", "Shop nu".

Element toolkit (pick what the ad needs, never all of them): two-colour headline, subtitle, handwritten arrow note, pill CTA, USP icon row (two to five items), frosted-glass USP panel, trust bar, script sign-off with a heart, wordmark or pep-schep.nl footer.

The five archetypes

Every new ad starts from one of these five. Choose by what the ad has to prove: one product for many buyers, a gift, a range, a group, or pure vibe.

Archetype	Use when	Skeleton	Reference
A. Multi-scene grid	One product fits several kinds of buyer	2x2 photoreal scenes, two-colour headline, subtitle listing the uses, glowing pill CTA, wordmark	Neon
B. Styled gift flat lay	Personalised products, gifts	Product flat on a soft textured surface, gift props at the edges, handwritten arrow to the print, pill CTA, two USPs, URL	String eigen tekst
C. Studio sale	Sales, several colourways, retargeting	Seamless light grey, huge condensed headline, spaced subtitle, 3 USP icons, products floating in a zigzag, trust bar	Sunglasses
D. Squad lineup	Group orders, vrijgezellen, friend groups	Six to eight variants in neat rows in a holiday or party scene, script plus heavy headline, callout to the print, frosted USP panel, script sign-off	Group strings
E. Vibe shot + giant CTA	Seasonal products with a strong setting	One photoreal product shot that is the whole story, a giant two-word command, nothing else	Hoodie in snow

Which formats: 9:16 for Stories and Reels (A, C, D, E), 1:1 or 4:5 for the feed (B). Make each winning ad in the other ratio too.

Matching scene to occasion:

- Festival: grass, golden hour, stage lights out of focus.
- Vrijgezellen or girls' trip: beach at sunset, pool edge, hotel bed with confetti.
- Gift: satin or linen, ribbons, a gift box, warm window light.
- Koningsdag: orange accents, canal edge, Dutch flags.
- Winter or après-ski: fresh snow, pines, falling snow.
- Home and decor: real rooms at night where the product glows.

Hard rules

These rules apply to every ad, whatever the archetype. Breaking one means the ad gets rejected by Meta, misleads a customer, or looks fake.

Always:

- Use the real product photo as the reference. Shape, fabric, colour and print stay exactly as they are.
- Put the print where Pep Schep really prints it, and make it visible.
- Only use the personalisation options that exist: eigen tekst and eigen foto. No invented designs or logos.
- Copy the logo or wordmark from the reference file. Never let the AI draw it.
- Check every Dutch word for spelling, letter by letter.

Never:

- People, body parts, mannequins or anything standing in for a body, especially with strings.
- Profanity or sexual words in the ad, including masked ones like SI*t. Meta rejects them.
- Prices, ratings, review counts or "sold" numbers unless they are real and current. Check the "4,8/5" on the sunglasses ad before reusing it.
- Extra text, icons or arrows that weren't asked for, or arrows that point at nothing.
- Generic placeholder images inside an "eigen foto" print. Use a real-looking phone snapshot.

Master prompt

Paste this block once at the start of a chat (ChatGPT custom instructions, a Gemini Gem, a Claude project) together with the five reference images. Then ask for each new ad with the short request template below it.

You are the ad designer for PEP SCHEP (pep-schep.nl), a Dutch festival and party webshop for NL and BE. You make static social ads for Instagram, Facebook and TikTok. The five attached images are our reference ads; match their quality, layout logic and tone.

WHAT AN AD IS

- One hero product, no people, no body parts, no mannequins.
- A scene that makes the occasion obvious at a glance (festival, girls' trip, gift, Koningsdag, apres-ski, home decor), photoreal, or a clean seamless studio for sale ads.
- Three zones top to bottom: headline (top 25-30%), product (middle, sharpest and brightest thing in frame), action (bottom 20-25%: CTA, then USPs, then footer).

ARCHETYPES (pick one, say which)

A Multi-scene grid: 2x2 scenes, one product for four buyers.

B Styled gift flat lay: product flat on soft fabric, gift props at the edges, handwritten arrow to the print.

C Studio sale: seamless light grey, huge condensed headline, 3 USP icons, products floating in a zigzag, trust bar.

D Squad lineup: 6-8 variants in neat rows in a holiday or party scene, script + heavy headline, frosted USP panel.

E Vibe shot + giant CTA: one photoreal product shot, a giant two-word command, nothing else.

TYPE AND COLOUR

- Headline: heavy geometric or condensed sans, 2-4 words, often two colours. Optional brush script paired with one heavy word.
- Subline: one light line, or letter-spaced capitals.
- Handwritten marker note with a curved arrow pointing at the print, when the print is the point.
- CTA: white bold text in a rounded hot-pink pill, ending in an arrow.
- USPs: thin line icons with small bold capitals, 2-5 items.
- Accent colour hot pink/magenta for one headline word and the CTA. Otherwise black and white; dark red for script on warm scenes.

COPY

- Dutch, informal (jouw, jullie, je), short, often in pairs: "Jouw design. Jouw style."

- One CTA only: "Ontwerp de jouwe", "Bekijk het aanbod", "Shop nu".

- Allowed USPs: Gratis verzending, Vandaag besteld = morgen in huis, Gratis goodiebag, Voor groepen of vanaf 1 stuk, Eigen tekst of foto.

HARD RULES

- The product, its colours and its print match the attached product photo exactly. The print sits where we really print it and is visible.

- Personalisation is only eigen tekst or eigen foto. Never invent other designs or logos. Copy our logo from the reference; never draw one.
- No profanity or sexual words, also not masked with symbols.
- No prices, ratings or numbers unless I give them.
- No extra text, icons or arrows I did not ask for. Check every Dutch word for spelling.
- Render text exactly as I write it, letter for letter.

BEFORE YOU GENERATE

Reply first with: archetype, scene, headline, subtitle, CTA, USPs, and the print position. Generate only after I say go.

Request template for each new ad:

New ad. Product: [name] (photo attached). Occasion: [festival / vrijgezellen / gift / Koningsdag / ...]. Archetype: [A-E or "you choose"]. Format: [9:16 / 1:1 / 4:5]. Headline: "[...]". Subline: "[...]". CTA: "[...]". USPs: [...]. Personalisation shown: [eigen tekst "... " / eigen foto / none].

QA checklist

Zoom in on each generated ad and tick every box. If anything fails, send the AI one numbered list of fixes and tell it to keep everything else exactly the same.

- ☐ Product matches the reference: shape, colour, fabric
- ☐ Print is on the correct side and clearly visible
- ☐ Every Dutch word is spelled right, letter by letter
- ☐ Logo or wordmark is the real one, not redrawn
- ☐ No people, body parts or suggestive props
- ☐ No profanity or sexual words, masked or not
- ☐ No invented prices, ratings or numbers
- ☐ No extra text, icons, or arrows pointing at nothing
- ☐ Headline readable at phone size in under one second
- ☐ CTA has room around it and is the only button
- ☐ Key text sits outside the top and bottom 250 px in 9:16
- ☐ "Eigen foto" prints look like real phone snapshots
